WEBSITE OVERVIEW

Super-Pharm's online store is a large and easy-to-use shopping website. It is similar to Amazon but focuses on health, beauty, and lifestyle products. As the top retailer in Israel, the site has many items like medicines, personal care products, cosmetics, baby supplies, and household goods.

The website also offers special options like buying from external sellers. You can find cars, insurance plans, computers, and even government services.

Super-Pharm makes shopping simple with a clear design, easy search tools, and smooth navigation. Based on our personal experience during the project, we discovered unique features like live chat with a pharmacist and tools for checking skin health - These features make the platform feel like shopping in a real store.

TESTING SCOPE

We thoroughly tested the Super-Pharm website, starting with 'End to End' functional testing. This included placing and canceling orders, updating personal details, and verifying smooth system responses. We reviewed terms of use, tested product categories and information, and checked tools like the skin diagnostic tool, ensuring it worked well on Android and iPhone. Additional testing covered the survey feature and the '**בית מרקחת שלי**' section under '**קופת חולים כללית**'.

On mobile, we tested features like interactive banners, rotating reviews, screen orientation (portrait and landscape), and gestures like pinch-to-zoom, swiping, and scrolling. Compatibility with Safari and Google Chrome on both Android and iPhone was confirmed. Overall, we validated the website's core functions across 15 main areas and 30 sub-areas.

EXIT CRITERIA 

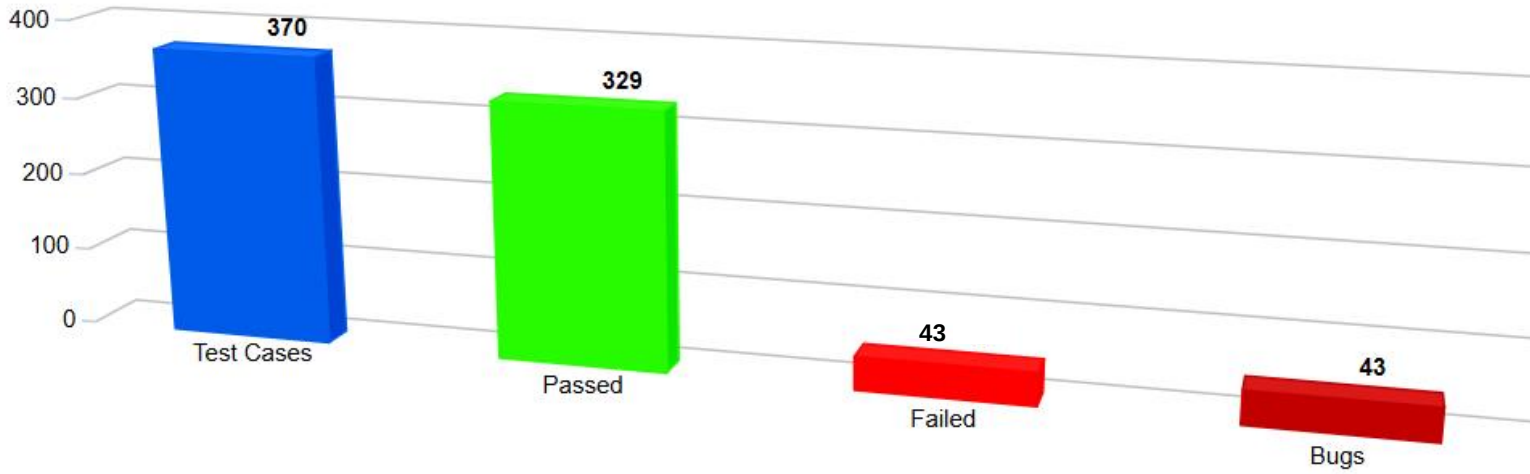

More than 90% of the tests have been completed. There are no functional bugs with high severity, including Critical or Show Stopper issues. There are also no Major functional bugs without a workaround or high-priority bugs. All open bugs are of low severity, and no serious bugs have been reported in recent days.

CONCLUSIONS 

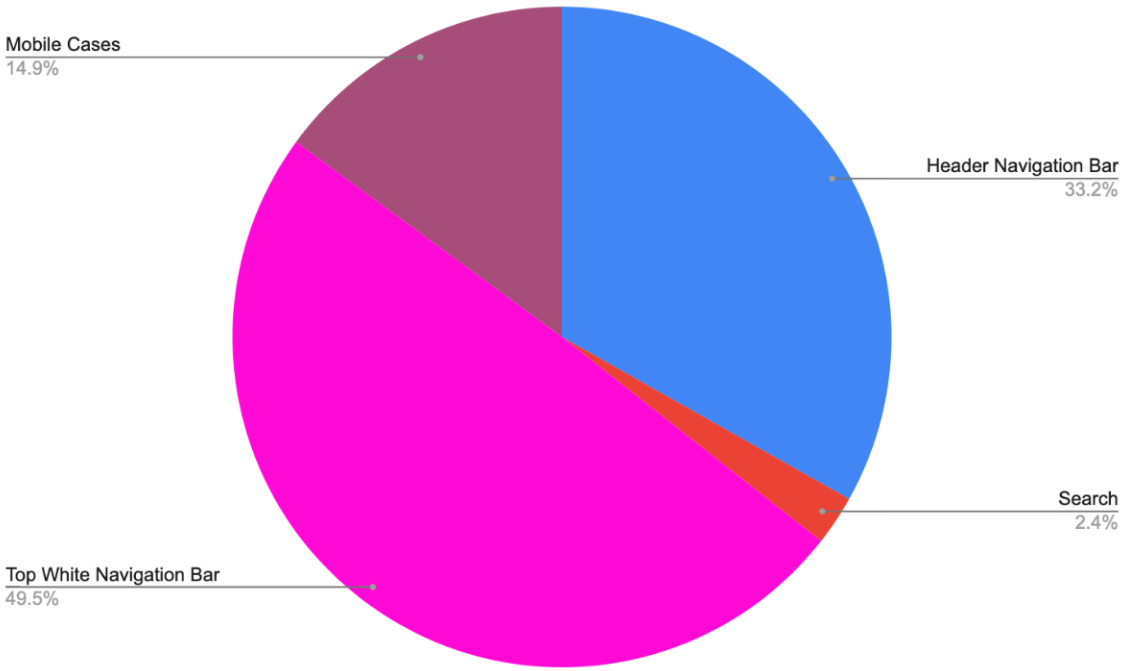

Based on the testing, the website is functioning well and **Ready for launch**.

Although 43 defects were found, none are major issues that would affect the overall user experience. The site provides a smooth and positive shopping

TestRail

We tested the Super-Pharm website using **TestRail** for the entire testing process. The system helped us manage and document the tests, track progress, and ensure all test cases were executed correctly. This made the process much more efficient and organized.

Description

Steps to Reproduce:

1. Open the link https://shop.super-pharm.co.il/ and log in to your existing account using your email and password.
2. Click on your username in the top right corner
3. Click on "Update my details"
4. Scroll down and click on "הוספת כרטיס אשראי/כרטיס lifestyle נוסף"
5. Enter an incorrect or invalid expiration date for a credit card (e.g., 13/25).
6. Fill in the rest of the credit card details (e.g., card number, CVV).
7. Submit the form.

Actual Result:

The system does not specifically identify the error in the expiration date during data entry. Instead, it allows the user to complete all fields and submit the form. Upon submission, a generic error message is displayed, requiring the user to start the entire process again.

Expected Result:

The system should validate the credit card expiration date in real-time during data entry and immediately notify the user of the specific issue with the expiration date. This behavior should match the system's existing functionality for errors in the credit card number, which provides immediate feedback and specific error messages.

2. Click on the "Beauty" category.
3. Select the "Facial Skin Diagnosis" feature.
4. Click on "Diagnosis and Personalization."
5. Click on "Let's Start."
6. At the question "What is your skin type?", select "I don't know."
7. Review the options provided for skin type descriptions.

Actual Result:

The issue appears in the last answer option, which reads:
"My skin feels oily around the nose and the forehead (the T-zone), while the rest feels dry/and the forehead."
This option contains spelling errors, grammatical mistakes, and an unnecessary repetition of "forehead" at the end.

Expected Result:

The last answer option should be clearly and correctly phrased, without spelling or grammatical errors, and should read:
"My skin feels oily around the nose and the forehead (the T-zone), while the rest feels dry."

Actual Result:

The heading above the link reads:
" מזמינים אותך לנסות ולהכיר את היועצת הדיגיטלית שלנו, ובקליק אחד, להזמין את מצורי האיפור המתאימים לך, במשלוח עד הבית או באיסוף מהסניף."
The text contains a spelling error: the word "מצורי" is incorrect.

Expected Result:

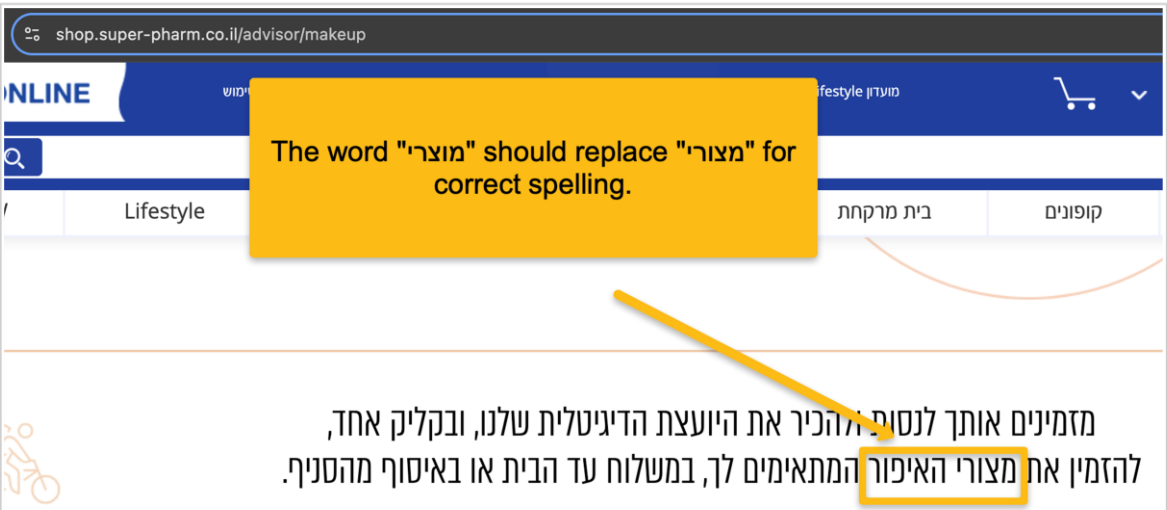

The heading should read:
" מזמינים אותך לנסות ולהכיר את היועצת הדיגיטלית שלנו, ובקליק אחד, להזמין את מוצרי האיפור המתאימים לך, במשלוח עד הבית או באיסוף מהסניף."
The word "מוצרי" should replace "מצורי" for correct spelling.
