MOBILE OVERVIEW

The Tiv Ta'am shopping app is a hybrid mobile application designed to make shopping easier for its users. It offers deals and special offers for loyal customers and includes advanced features that leverage smartphone capabilities, such as:

- **Product Scanning**: Using the phone's camera to scan barcodes and check product availability.
- **GPS Integration**: Helping users locate the nearest branch based on their location.
- **Delivery Services**: Offering deliveries on weekends and holidays.
- **Shopping List Management**: Allowing users to create and save multiple shopping lists.
- **Recipe Suggestions**: Providing a variety of recipes alongside a wide selection of food products.

While the app's concept is promising, its execution falls short in several areas. Key features often fail to function properly on some devices, and even without these technical issues, the user experience is frustrating.
Some of the major problems include:

- **Performance Issues**: The app frequently freezes or crashes.
- **Critical Feature Failures**: The scanning feature does not work on certain devices, and some users are unable to add a credit card. These are show-stopper bugs that severely impact usability.
- **Error Handling**: The app lacks proper error messages to guide users when problems occur, making it difficult to understand and resolve issues.
- **Unattractive Design**: Images on the homepage are cropped, the splash screen logo is partially cut off, and some recipe titles overlap with images, making the text hard to read.
- **Low Security**: The app appears to fall short of strong security standards.

Despite its good intentions, the **Tiv Ta'am** app fails to deliver a smooth or reliable shopping experience, leaving users disappointed.

TESTING SCOPE

The testing process for the Tiv Ta'am shopping app was conducted across two environments: Android and iPhone. We identified significant differences in both the user experience and the app's basic functionality between these platforms. For example:

- On Android devices, adding a credit card was not possible.
- On iPhone devices, logging in via Facebook was unavailable.

Despite these issues, we performed **end-to-end functional testing** and ran the system through its full workflow. For devices where ordering was possible, we completed an order using a credit card, tested the delivery process, and verified the cancellation procedure.

Our testing covered the following areas:

- **Mobile App Functional**: Installation, uninstallation, location services, language settings, accessibility, compatibility with various mobile screens, performance, user experience, stability and usability.
- **Website Structure**: Navigation through the site map, ensuring that all links are direct to the intended destinations.
- **Product Pages**: Verifying product visibility, the ability to add products to the cart across all categories and navigation within the app.
- **Key Features**: Testing the scanning feature, the personal details section, and the password reset process.

Testing Results:

- **Android :**Out of 647 tests, 45 failed, resulting in 36 bugs reported.
- **iPhone** :Out of 531 tests, 33 failed, resulting in 22 bugs reported.

In some cases, a single bug was linked to multiple failed tests.

Critical Findings:

Some bugs considered critical, including one **show-stopper level issue** where the app's functionality was completely blocked.

This thorough testing revealed a range of issues, from minor design flaws to severe functional failures, highlighting the need for significant improvements.

EXIT CRITERIA

More than 90% of the tests have been completed. There are no functional bugs with high severity, including Critical or Show Stopper issues. There are also no Major functional bugs without a workaround or high-priority bugs. All open bugs are of low severity, and no serious bugs have been reported in recent days.

CONCLUSIONS

Based on the testing results, the app is
The user experience is poor, with problems ranging from design issues to performance failures. Key features, like product scanning and basic functionalities, are not working properly or reliably.
Additionally, users are unable to add a credit card, and on the credit card details screen, clicking on "Cancel" leads to an error.
In its current state, the app does not provide a smooth or attractive shopping experience, making it difficult to appeal to and retain customers. Some of the reported bugs have been identified only in the past few days, highlighting ongoing critical issues.
Significant improvements are needed before the app can be released.

Severity:	S3 - Major

Description

When filling in the address field during the checkout process, the system does not correctly identify "מגדים 3 רמת גן." The system either suggests other cities (e.g., ראש העין, ירושלים) or only recognizes the street in רמת גן without the house number. There is no additional field to manually input the house number, preventing users from completing a specific delivery request.

Steps to Reproduce:

1. Open “טיב טעם” app.
2. Select a list of products priced above 300₪.
3. Click "קופה" and complete the purchase process by selecting "סיום קנייה."
4. Check the box confirming that you are over 18.
5. Click "משלוח."
6. In the address field, search for "מגדים 3 רמת גן."

Actual Result:

The system recognizes "מגדים 3" in other cities like ראש העין and ירושלים but only identifies the street "מגדים" in רמת גן, omitting the house number. There is no additional field to manually input the house number, preventing delivery to the specific address.

Expected Result:

The system should accurately recognize "מגדים 3 רמת גן" as a complete address and provide an option to deliver to that specific house number within רמת גן.

[TT-2] Apartment Entry List Remains Open When Clicking on a Different Input Field in Delivery Details Form Created: 20/Jan/25

Description

In the delivery details section during the checkout process, the apartment entry dropdown list does not close when clicking on a different input field. This behavior creates a confusing user experience and may lead to errors during form completion.

Steps to Reproduce:

1. Open “טיב טעם” app.
2. Navigate to the delivery details form during checkout.
3. Open the apartment entry dropdown list by clicking on it.
4. Without selecting an entry, click on a different input field (e.g., the "First Name" or "Street" field).

Actual Result:

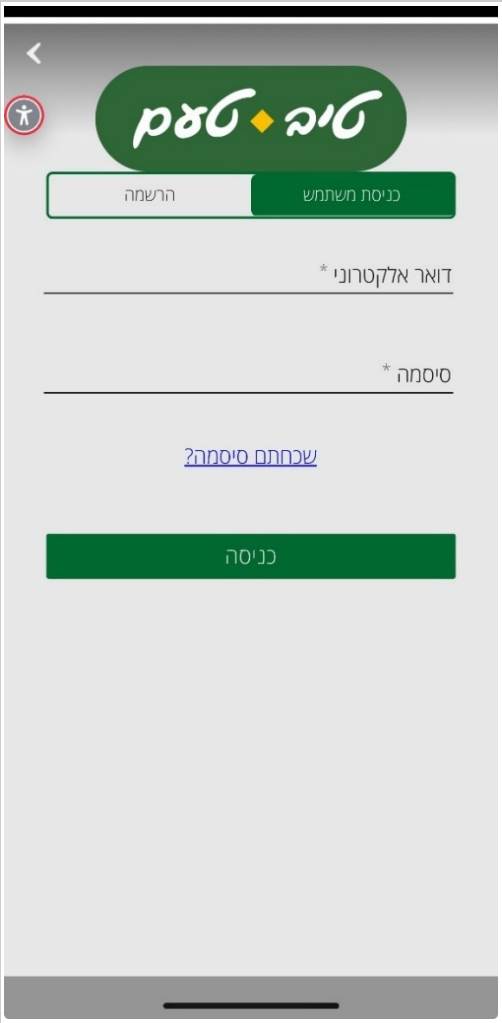

The apartment entry dropdown list remains open, overlapping other input fields, and disrupting the user experience.

Expected Result:

The apartment entry dropdown list should automatically close when the user clicks on a different input field, allowing users to focus on the new field without distractions.

[TT-3] Missing Facebook Login Option on iOS 18.1.1 Created: 20/Jan/25

Description

On devices running iOS 18.1.1, the option to log in via Facebook is not available in the application. However, the feature works as expected in other environments, such as on the Xiaomi Redmi Note 13 Pro 5G. This indicates an integration issue between the application and the Facebook interface specific to iOS devices.

Steps to Reproduce:

1. Open the "טיב טעם" application on an iPhone running iOS 18.1.1.
2. Navigate to the login screen.
3. Observe the absence of the Facebook login button.
4. Compare the behavior by opening the application on a Xiaomi Redmi Note 13 Pro 5G.

Actual Result:

The Facebook login button is missing on iOS 18.1.1 devices. Users cannot log in using Facebook on these devices.

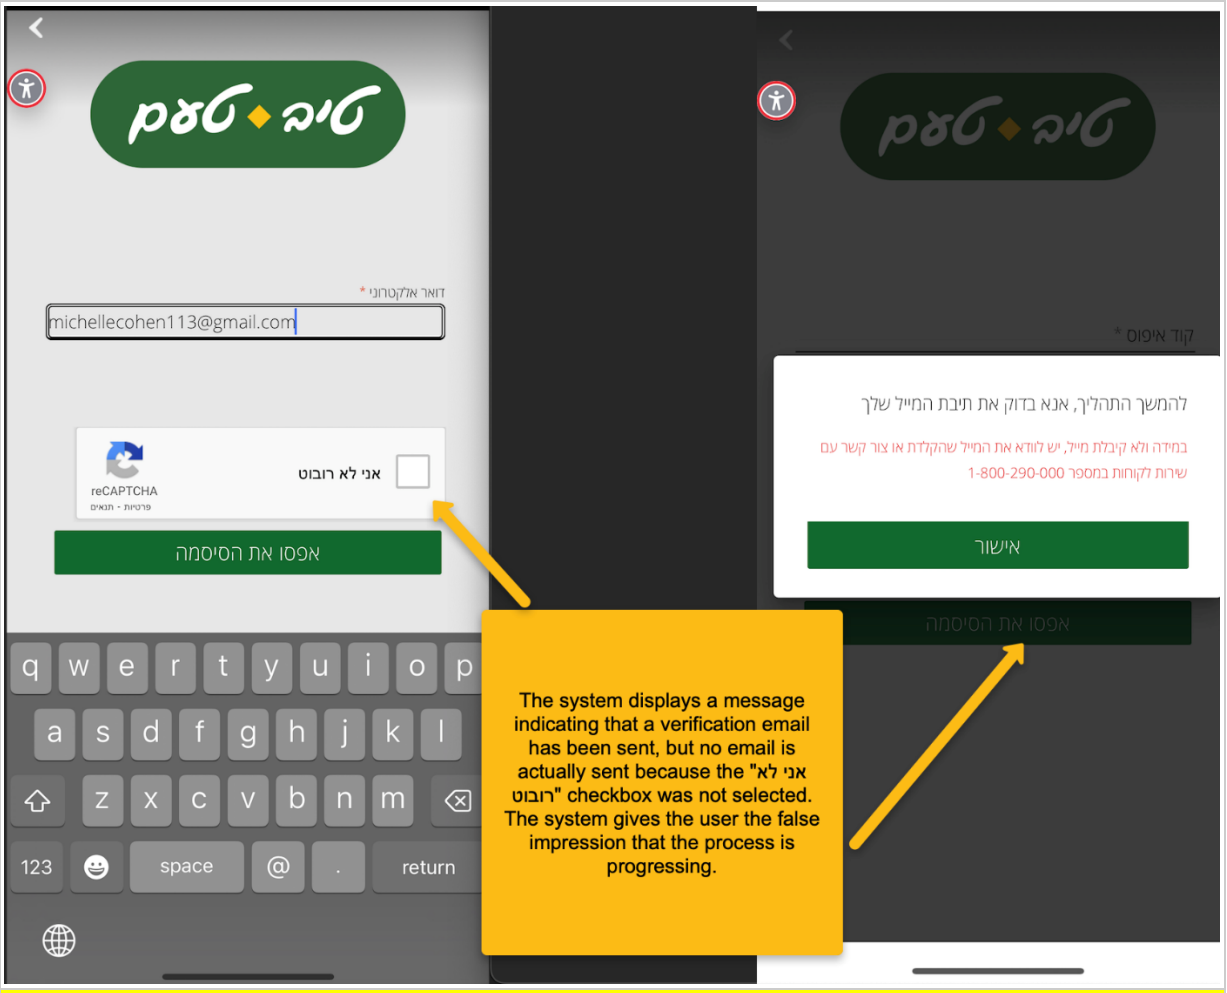

Expected Result:

The Facebook login button should be available on all supported platforms, including iOS 18.1.1, allowing users to log in using Facebook without issues.

[TT-4] System Misleads User into Thinking the Password Reset Process is Progressing Without "אני לא רובוט" Checkbox Created: 20/Jan/25

Status:	To Do

Severity:	S4 - Minor

Description

During the password reset process, the system allows users to proceed without checking the

"אני לא רובוט" (I'm not a robot) checkbox. After entering a registered email and clicking "שליחה" (Send), the system shows a message indicating that an email with a verification code has been sent, even though the email is not actually sent because the checkbox was not selected. This misleads the user into thinking the process is progressing and that an email is on its way, causing unnecessary waiting time.

Steps to Reproduce:

1. Open “טיב טעם” app.
2. Navigate to the ״כניסת משתמש״ screen and click "שכחתי סיסמא" (Forgot Password).
3. Enter a registered email address in the provided field.
4. Without checking the "אני לא רובוט" checkbox, click the "שליחה" (Send) button.
5. Observe the system's response and check if the verification email is received.

Actual Result:

The system displays a message indicating that a verification email has been sent, but no email is actually sent because the "אני לא רובוט" checkbox was not selected. The system gives the user the false impression that the process is progressing.

Expected Result:

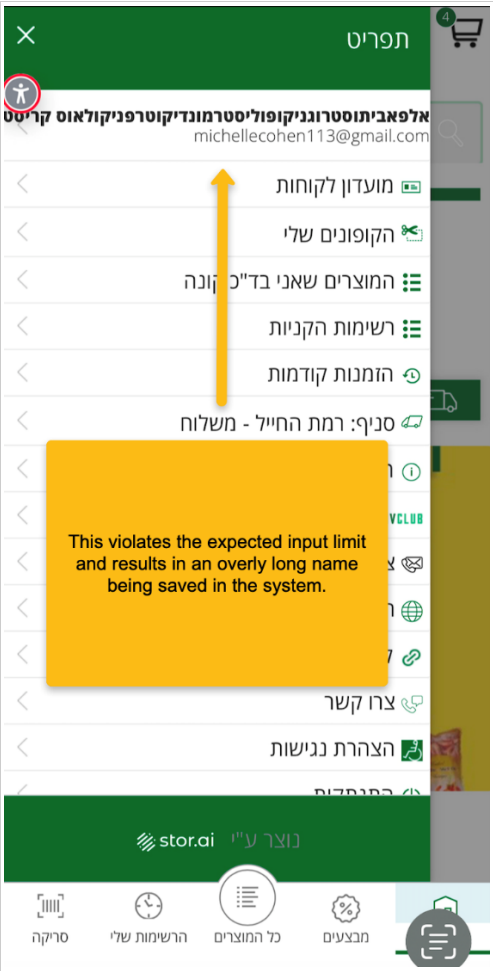

The system should display an error message, such as "Please confirm you are not a robot by checking the box," and prevent the user from proceeding until the "אני לא רובוט" checkbox is selected.

[TT-5] System Allows First and Last Name Fields to Exceed 50 Characters

Created: 20/Jan/25

Status:	To Do
Project:	Tiv Taam

Severity:	S5 - Low

Description

In the personal details update section of the app, the system allows users to enter more than 50 characters in both the "First Name" and "Last Name" fields. This violates the expected input limit and results in an overly long name being saved in the system.

Steps to Reproduce:

1. Open “טיב טעם” app.
2. Click on ״כניסת משתמש״ → Login with name and password.
3. Navigate to the ״פרטים אישיים״ section in the app.
4. In the "שם פרטי" field, enter "אלפאביטופלקסטרוגנוזיניפרוסוליאנדרופוליסקסון" (a name longer than 50 characters).
5. In the "שם משפחה" field, enter "קריסטופלקסטרוגנוזיניפרוסוליאנדרופוליסקסון" (or a similarly long name).
6. Click on ״שמור״.

Actual Result:

The system allows more than 50 characters to be entered in both the "First Name" and "Last Name" fields without restriction.

Expected Result:

The system should restrict the "First Name" and "Last Name" fields to a maximum of 50 characters, displaying an error or preventing further entry once the limit is reached.

[TT-6] System Allows Exiting "פרטים אישיים" Section Without Saving Changes

Created: 20/Jan/25

Severity:	S5 - Low

Description

After entering personal details such as address and phone number in the "פרטים אישיים" (Personal Details) section, the system does not prompt the user to confirm if they want to save their changes when exiting the section. Upon returning to the personal details section, the changes are lost, as they were not saved, creating confusion and a poor user experience.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the "פרטים אישיים" (Personal Details) section.
3. Enter or update details such as address and phone number.
4. Without saving the changes, exit the "פרטים אישיים" section by navigating to another part of the app or closing the app.
5. Re-enter the "פרטים אישיים" section and observe that the changes are not saved.

Actual Result:

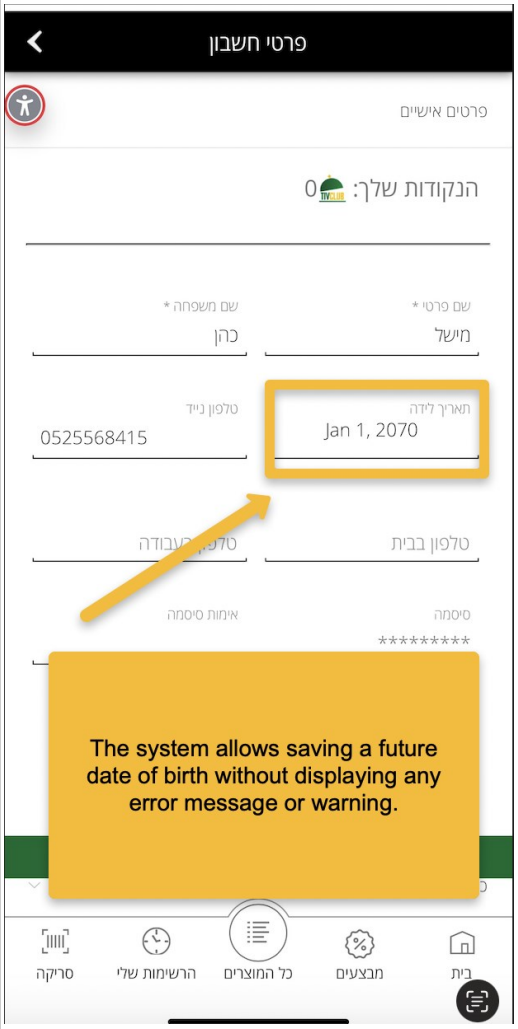

The system allows the user to exit the "פרטים אישיים" section without displaying a prompt asking if they want to save their changes. When the user returns, the changes made are not saved.

Expected Result:

The system should display a prompt asking the user if they want to save their changes before exiting the "פרטים אישיים" section. If the user chooses not to save, the changes should be discarded; if they choose to save, the changes should be retained.

Description

The system allows users to enter and save a future date of birth (e.g., January 1, 2070), which should not be permitted. A date of birth in the future is invalid and could cause issues with the system’s user data.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the "פרטים אישיים" (Personal Details) section.
3. Enter a future date of birth, such as January 1, 2070.
4. Attempt to save the changes.

Actual Result:

The system allows saving a future date of birth without displaying any error message or warning.

Expected Result:

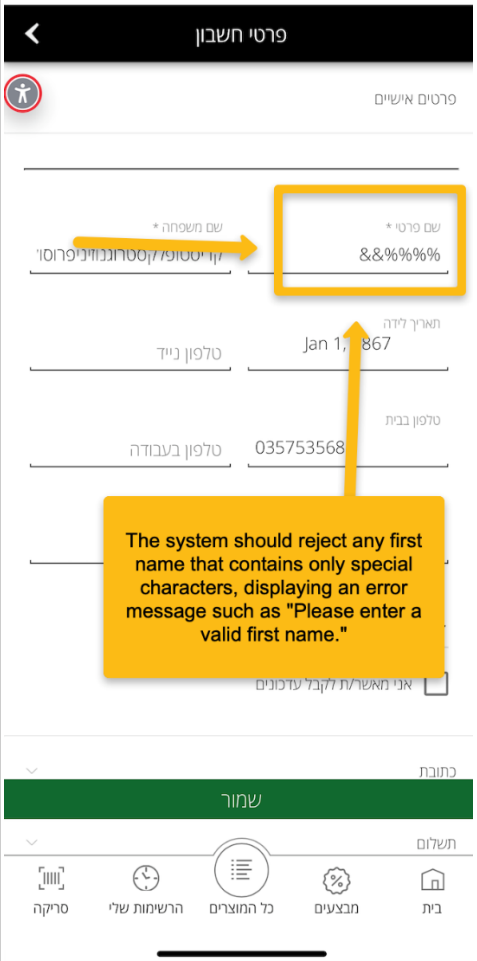

The system should validate the entered date of birth and prevent users from saving a future date. An error message should be displayed, such as "Please enter a valid date of birth."

[TT-8] System Allows Saving First Name with Only Special Characters

Description

The system allows users to save a first name with only special characters (e.g., "%%%%%&&"), which should not be permitted. After clicking "שמור" (Save), the system displays the message "ההגדרות שונו בהצלחה" ("Settings successfully changed"), even though the first name entered is invalid. This creates issues with data integrity and user experience.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the "פרטים אישיים" (Personal Details) section.
3. In the "First Name" field, enter only special characters (e.g., "%%%%%&&").
4. Click "שמור" (Save).
5. Observe the system's response after saving the changes.

Actual Result:

The system allows the first name to be saved with only special characters, and after clicking "שמור," the system displays the message "ההגדרות שונו בהצלחה" ("Settings successfully changed").

Expected Result:

The system should reject any first name that contains only special characters, displaying an error message such as "Please enter a valid first name." The user should be prompted to provide a name with alphabetic characters, and the "ההגדרות שונו בהצלחה" message should only appear for valid changes.

Description

While updating personal details, the system unexpectedly displays the user's email address in the "טלפון בעבודה" (Work Phone) field. Additionally, the email is highlighted in red, indicating an error. This issue arises despite there being no field for entering an email address in the "פרטים אישיים" (Personal Details) section. This results in a confusing and disorganized user experience.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the "פרטים אישיים" (Personal Details) section.
3. Begin entering or updating details in the fields.
4. Observe the "טלפון בעבודה" (Work Phone) field during the process.
5. Notice that the system incorrectly displays the user's email address in the "טלפון בעבודה" field, with the email highlighted in red.

Actual Result:

The system displays the user's email address in the "טלפון בעבודה" field and highlights it in red, indicating an error. This happens even though there is no email field available in the "פרטים אישיים" section.

Expected Result:

The system should not display the user's email address in the "טלפון בעבודה" field. It should also not show any error message for an email in the wrong field, and it should maintain a clean, organized interface for users when updating their details.

[TT-10] System Freezes When Adding Coupon "משקה חלב בטעם בננה"

Severity:	S4 - Minor

Description

When adding the coupon "משקה חלב בטעם בננה," the system becomes unresponsive for an extended period (over 30 seconds). A loading spinner appears in the center of the screen, but the **application does not respond**. The user is forced to exit and re-enter the app. Additionally, there is **no confirmation message** indicating the coupon was successfully applied. The only indication that the coupon was added is that the associated product appears in the cart.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the "הקופונים שלי" at the top right corner.
3. See the coupon "משקה חלב בטעם בננה" and click "הוסף" (Add).
4. Observe the system's behavior.
5. After the system becomes unresponsive, exit and re-enter the app.
6. Check the cart to confirm whether the coupon was applied.

Actual Results:

- The system becomes unresponsive for over 30 seconds, displaying a loading spinner.
- The user is forced to exit and re-enter the app.
- No confirmation message is displayed indicating the coupon was applied successfully.
- The only indication of the coupon being applied is the associated product appearing in the cart.

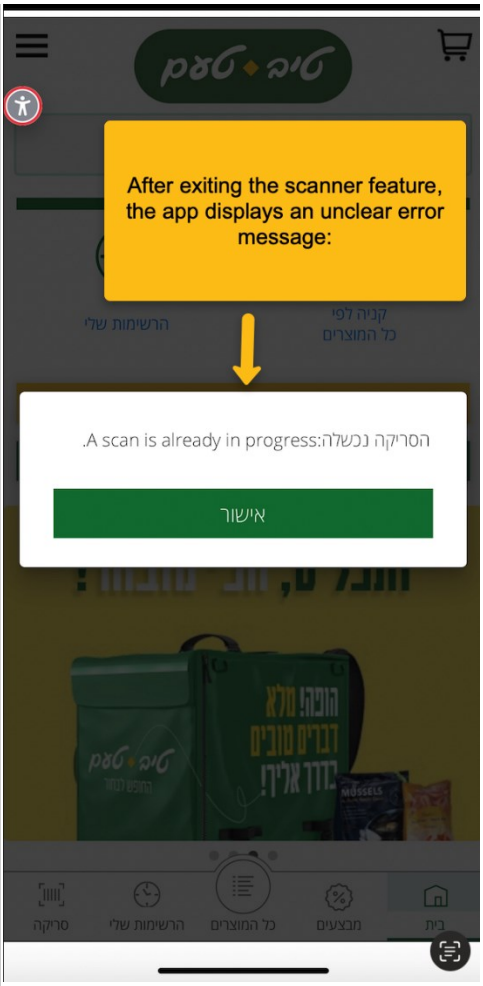

Expected Result:

- The system should apply the coupon without delays or freezing.
- A confirmation message should be displayed, such as "Coupon applied successfully."
- The application should remain responsive throughout the process.

[TT-11] Scanner Feature Fails to Recognize Barcodes and Displays Confusing Error Created: 21/Jan/25

Severity:	S2 - Critical

Description

The "סריקה" (Scan) feature in the app fails to recognize barcode*s for products. When initiating a scan, the camera opens, and the red scanning line appears, but there is *no response or automatic detection of the barcode. The camera remains open indefinitely without identifying the product.

After exiting the scanner feature, the app displays an unclear error message: "הסריקה נכשלה: a scan is already in progress." Over 10 scanning attempts were made with different products, including " נס קפה" by Taster's Choice, but *none were successful.

Steps to Reproduce:

- Open the "טיב טעם" app on the mobile device.
- Click to the "סריקה" (Scan) feature at the left button.
- Select a product (e.g., "נס קפה" by Taster's Choice).
- Use the camera to scan the barcode.
- Observe the behavior of the scanner.
- Exit the scanner feature after no response is received.
- Observe the error message displayed by the app.

Actual Result:

- The scanner fails to detect the barcode, and the camera remains open indefinitely with the red scanning line.
- No product is identified.
- Upon exiting the scanner feature, the app displays the message "הסריקה נכשלה: a scan is already in progress."
- The issue persists across multiple attempts with different products.

Expected Result:

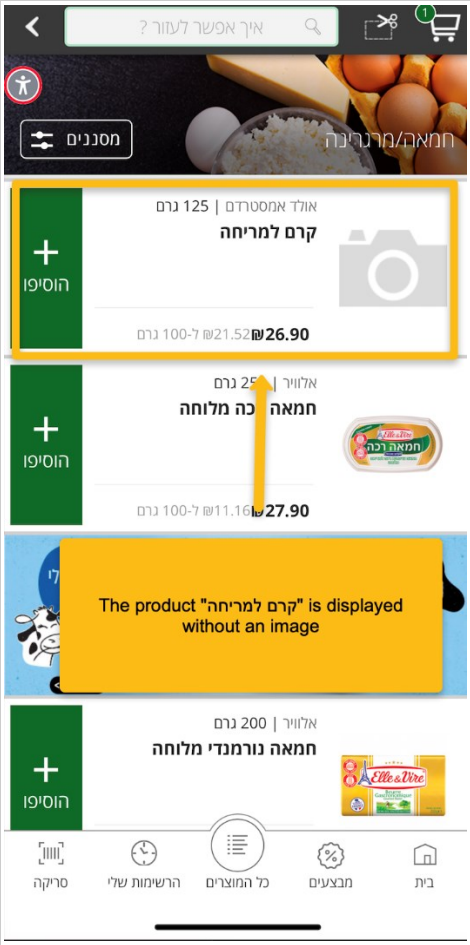

- The camera should automatically detect the barcode within a few seconds.
- The product associated with the scanned barcode should be displayed in the app.
- The user should be able to choose whether to add the product to their shopping cart.
- If the barcode is not recognized, the system should display a clear and relevant error message, such as "Barcode not recognized. Please try again."

Description

After changing the language of the app to English, **only** some of the product names were updated to English. Additionally, in the left-hand menu, certain categories such as "צרו קשר" (Contact Us) and "מועדון הלקוחות" (Customer Club) remain in Hebrew instead of being updated to English. This inconsistency creates a fragmented user experience, as the user interface does not fully reflect the selected language.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Click on the left menu.
3. Tap on the language switch option.
4. Select "English" as the new language.
5. Observe the product names and the categories in the left-hand menu.

Actual Results:

- Some product names are updated to English, but others remain in Hebrew.
- Categories such as "צרו קשר" (Contact Us) and "מועדון הלקוחות" (Customer Club) remain in Hebrew, even though the language was switched to English.

Expected Results:

- After switching the language to English, all product names and all categories, including "צרו קשר" and "מועדון הלקוחות," should be fully updated to English for a consistent user interface.

[TT-18] Cropped Main Images on Home Page Prevent Visibility of Text

Description

On the home page of the app, the main images are cropped, causing important parts of the images, including text, to be cut off. This issue affects the user experience as key information that should be visible is not properly displayed.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to the home page.
3. Observe the main images displayed on the page.
4. Notice that parts of the images, including text, are cropped and not fully visible.

Actual Results:

- The main images on the home page are cropped, and the text on those images is not fully visible.

Expected Results:

- All images on the home page should be displayed fully, without cropping, to ensure that the text and other important elements are visible to users.

Description

Every time the app is opened, the splash screen displays the logo in a distorted or cropped manner during the app loading process. This issue prevents the logo from appearing correctly, affecting the initial user experience.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Observe the splash screen during the app's loading process.
3. Notice that the logo appears cropped or distorted.

Actual Results:

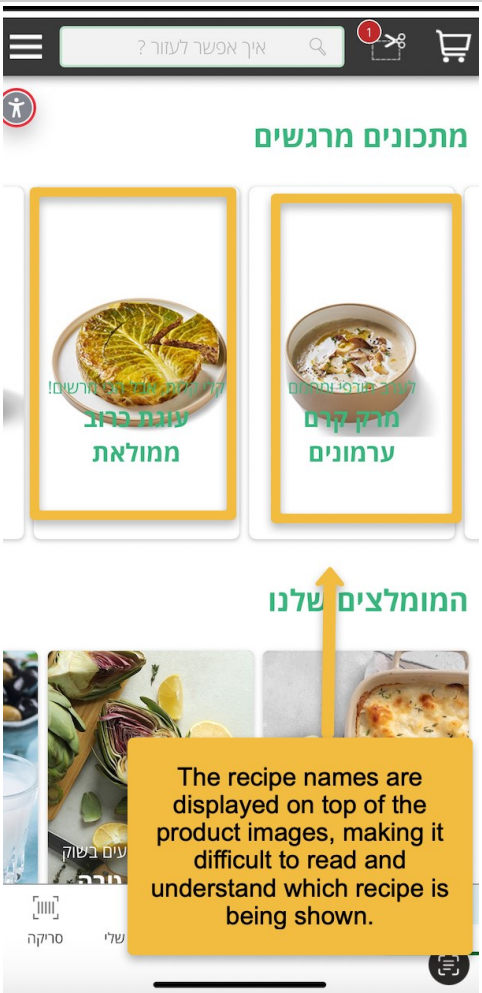

The logo on the splash screen is cropped and distorted during app loading.

Expected Results:

The logo on the splash screen should be displayed fully and clearly, without any distortion or cropping, for a consistent and professional appearance.

Description

On the home page, when scrolling down to the "מתכונים מרגשים" (Exciting Recipes) section, the text with the recipe names appears over the product images. The text is difficult to read due to the lack of contrast with the background images, making it hard for users to understand which recipe is being referred to.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device
2. Navigate to the home page.
3. Scroll down to the "מתכונים מרגשים" (Exciting Recipes) section.
4. Observe the text with the recipe names appearing over the product images.
5. Notice that the text is hard to read and unclear.

Actual Results:

- The recipe names are displayed on top of the product images, making it difficult to read and understand which recipe is being shown.

Expected Results:

- The text under the recipe names should be clearly visible and readable, either by increasing contrast, adding a background to the text, or positioning the text in a way that it doesn't overlap with the product images.

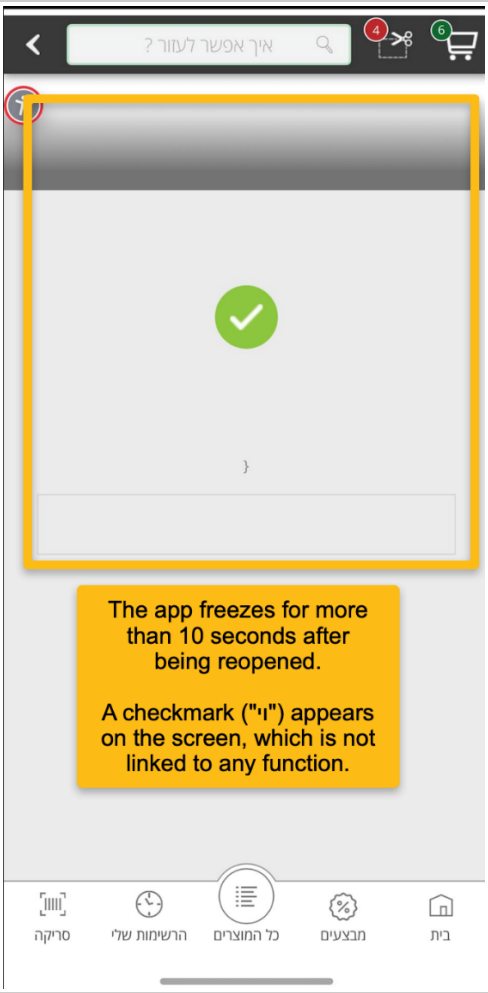

[TT-21] App Freezes for More Than 10 Seconds After Being Inactive for 24 Hours

Severity:	S4 - Minor

Description

After leaving the app inactive for more than 24 hours, reopening the app causes it to freeze for more than 10 seconds. During this time, the app does not respond, and a checkmark ("וי") appears on the screen, which seems unrelated and does not correspond to any function. This behavior negatively impacts user experience and the app's stability.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Use the application for a while.
3. Leave the app inactive for more than 24 hours.
4. Reopen the app.
5. Observe the app freezing for more than 10 seconds.
6. Notice the appearance of a checkmark ("וי") that is not related to any visible function.

Actual Result:

The app freezes for more than 10 seconds after being reopened.

A checkmark ("וי") appears on the screen, which is not linked to any function.

Expected Result:

The app should reopen and function normally without freezing or displaying unrelated symbols after being inactive for more than 24 hours.

Description

When the iPhone loses its internet connection and reconnects, the app notifies the user that there is no internet connection. However, once the internet is restored, the app does not retain the page the user was on and unexpectedly returns to the home page. Furthermore, when reconnecting, the app crashes and does not function properly until restarted.

Steps to Reproduce:

1. Open the "טיב טעם" app on the mobile device.
2. Navigate to a specific page.
3. Disconnect the internet connection on the iPhone.
4. Wait for the app to display a message indicating no internet connection.
5. Reconnect the internet connection.
6. Observe that the app returns to the home page and crashes upon reconnecting, without retaining the previous page.

Actual Result:

- The app returns to the home page and crashes after reconnecting to the internet.
- The app does not retain the previous page or state the user was on.

Expected Result:

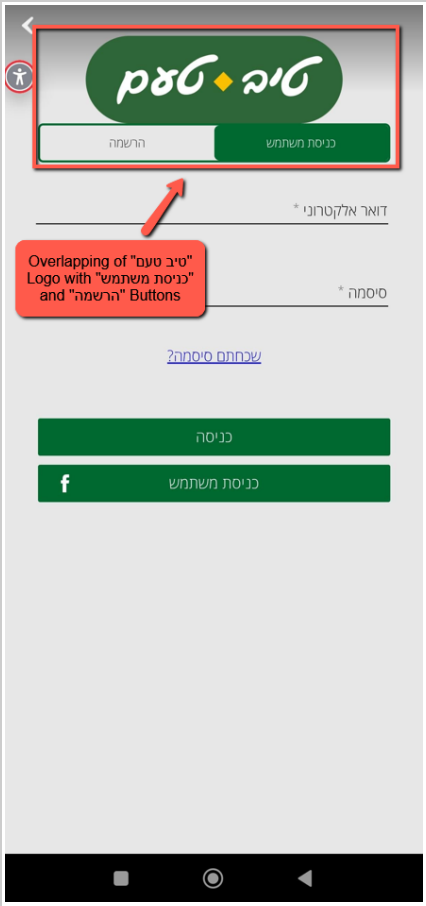

- When the internet is disconnected and then reconnected, the app should retain the page the user was on and continue functioning normally without crashing.
